WHY INVEST IN INDIA?

WHY INVEST IN INDIA?

India has now come a long way from being called just one of the developing nations. If the recent statistics are to be believed, it is the fastest economy in the world today, and its rate of growth is even higher than Italy, UK, or Russia. The rate of growth per annum is listed at 8.5% on an average basis. The nation even has more billionaires than China. The time is changing for the people in the nation too because it was estimated that the number of middle class/rich household would increase tenfold by the year 2025. So by this, the growth is clearly visible.

India hosts some of the finest technical and management institutes, and as a result, the skilled and qualified professionals are contributing a lot too towards the overall growth of the nation. The stock market has gone over 100% in recent times, but it is still seen that it will still scale. Moreover, the growth opportunities have attracted several overseas companies to invest in India and even the NRIs are interested a lot in contributing. Ever since the Prime Minister has announced the dual citizenship, NRIs are investing a lot in the market, and that flow of money has been helpful to the country. However, for the overseas people or the people living in India, the untapped market is a Real estate.

THE SCENARIO OF REAL ESTATE:

There are several ways as to where one can invest in India and stock market and jewellery are some of the common ways. However, due to the growth in development and progress in the nation, Real estate has emerged as the most preferred choice of investing. People tend to invest for the long-term purpose and having a property is a truly safe choice. The real estate sector in India is mainly divided into Residential and Commercial space. The demand for them is skyrocketing, and because of this, the prices are driving up as well. In the metro cities such as Delhi NCR and Mumbai, the price for commercial spaces are high, and even the rent of them is high. The prices in metro cities will keep on rising because of the increase in demand.

People are choosing Real estate for their investment purpose, and even the leading developers are increasing the price of the real estate market of the nation.

THINGS TO BEWARE OF:

There are certain risks involved in the property investment as well, and that is why it is advised that proper care must be cautioned. When it comes to the residential investment, it is advised that such a place should be preferred which is about to ready or is a new scheme. That is a great choice for the investment, and especially if the area is being developed, the price of it is surely going to increase. The investment for the commercial space is not usually for a long-term, and even the risks are substantial in it. One just has to make sure that the quality is maintained and has proper approval. Transparency will play a huge role here as there have been certain cases where people were defrauded by the name of fraudulent schemes.

Despite these things to be cautious about, the real estate sector is still the most lucrative mode of investment in India and especially if one is looking at it from a long-term perspective.

WHY INVEST IN GUJARAT?

WHY INVEST IN GUJARAT?

When it comes to the investment, lot of overseas companies and firms are opting for India. The nation has come a long way and is one of the top countries in the world. The investment opportunities are extremely vast here. The new policies introduced by the government and the large consumer market have attracted several global businesses to expand their operations in India also. The rate at which the development, progress, growth rate has been increasing, India is touted as the fastest growing developing nation, and within a few years, it will cement its place amongst the top nations.

Now the question arises as to where to invest in India. It surely is a large nation and one cannot just simply all over the country for the first time. According to some current statistics and recent surveys, it was known that Gujarat is a suitable location for the investment purpose because of several factors.

INDUSTRIAL POLICY

As per the new Industrial Policy 2015, the government of the state wants to focus more on the industrial production and a good environment for the smooth conduction of business. This new policy of the state has its primary goal focused on the better development scale of the state on an industrial level. The Gujarat Industrial Policy 2015 clearly explains the steps that the government would take for the crafting of an industrial environment and also indicates certain more changes in the resolutions. The policy wants to follow a broad idea of the creation of proper structure and framework to empower people and present job opportunities by means of industrial growth. The ability to facilitate businesses will be improved as well. The government of Gujarat wants to do more than just allocate the resources and permissions, and hence, steps are being taken for the simulation of institutional learning.

GDP

Having the coastline of 1,600 km, Gujarat is a high growth state in India. It ranks 3rd in the list of GDP of union territories and the Indian States. It is regarded as a highly developed state from the industrial point of view and is also contributing around a quarter to the export of goods in India. The industrial sector consists of more than 800 major industries and over 4.5 lakh small and medium enterprises.

Political Stability

Gujarat has been lucky in this aspect. Having the same ruling party for over the duration of consecutive 17-18 years has helped a lot in the political stability in the state. The focus of the government has been for the peace and betterment of the people. The growth and development of the state in the last two decades has been truly remarkable. The faith of people have always been there on the government of the state, and that is why just one political party has been ruling it since such a long time.

REAL ESTATE MARKET

Gujarat has a premier legacy when it comes to the industries, and the tipping point always has been the love of people towards entrepreneurship. Seeing its growth over the past several years, the growth opportunities and initiatives are coming in high number. Two of the most prominent initiatives have been GIFT and DMIC. Apart from that, several tech firms, MNCs, IT parks, integrated townships, commercial spaces, and retail hubs are getting established. Urban changes are being made to the top cities in Gujarat for making it more citizen-friendly and more sustainable. The result in a hike in employment opportunities is because of the surge and influx of business sectors. All this has affected the real estate market in the state and is now buyer focused. The investment opportunities are ample for the investor or buyer.

The scenario of the real estate market in Gujarat looks very promising as several prominent developers have already launched new schemes and some are on the verge of announcing new projects in a short while. Hence, it can be said that Gujarat is a highly favourable and suitable destination for the real estate investment.

WHY INVEST IN DHOLERA?

WHY INVEST IN DHOLERA?

When Mr Narendra Modi announced the launch of the first smart city of the nation, the news spread like wildfire. It is to be developed at Dholera and is even termed as the Special Investment Region (SIR) and hence the name of this soon to be remarkable city got termed as Dholera SIR. This will be a fully developed smart city and the foremost in the nation, and upon the completion of the project, the city will be termed as one of the top cities in the world. The project may be new and is in the initial phase, but it has already garnered a lot of attraction and interest from the investors and companies, nationally and internationally.

The city is to be said to be bifurcated in terms of Phases on the basis of the construction. The first phase upon which work has already started will be for the residential purpose. People are already showing a great deal of interest in purchasing the plots there.

ADVANCED FEATURES

- The city will be connected with 10 lanes express highway, BRTS system, and Metro rail so that there will be no transit issue. The BRTS system is already successful in the city of Ahmedabad, and the metro train service is successful in certain metropolitan cities.
- With the approval of the Airport Authority of India, an International Airport which will be equipped with the Cargo facility is already being developed at a large scale for the Dholera SIR.
- Sea transit between Bhavnagar and Bharuch by means of ferry will ensure that a lesser amount of time is taken.
- The Government of Gujarat has acquired approximately 75,000 acres of land, and within that, it will be constructed and developed as Model Township which will be highly modern.
- The logistic support for the Mumbai-Delhi dedicated freight carrier corridor will be efficiently linked with road and rail network.
- Utmost care will be taken for the health care and educational facility, and it will be ensured that the top quality education centres, institutes and state-of-art medical centres will be established.

Dholera smart city will be the perfect blend of the amalgamation of nature and technology. The plan is such that it will have vast lush green gardens and also modern architecture marvel such as skyscrapers. Moreover, each house will be equipped with Wi-Fi facility and efficient garbage and drainage system. Luxurious amenities will be provided throughout the city, and even the transport connectivity services will be top notch.

All these features when fitting together with the residential scheme, it makes the project quite surreal. This is the right time to invest in the residential plots at this time because the schemes are quite affordable as well which would make it the perfect fit for low investment and high returns. If the idea is to invest in the long-term project, then Dholera SIR is the perfect fit to get in, and this is the perfect time to invest in. The high tech features in this first smart city make it a great project to invest in.

DHOLERA

1ST HIGH TECH SMART CITY OF INDIA

- ☑ TOTAL AREA 920 SQ.KM (2,27,336 acres)
- ☑ DEVELOPABLE AREA 567.39 SQ. KM (1,40, 108 acres)
- ☑ MASTER PLANNING OF DHOLERA SIR IS DONE BY HALCROW COMPANY, U.K.
- ☑ Dholera SIR 1st smart city of India and pet project of Hon'ble PM Mr. Narendra Modi.
- ☑ Dholera SIR India's 1st High-Tech Smart City with better infrastructure than that of Singapore & Hongkong
